README METADATI

About

The pilot projects selected for **ATLAS** are divided into five categories, each representing a specific type of research product. Each category is associated with a set of labels used to describe the metadata of the projects belonging to it.

Reasearch Product

The selected labels for metadata registration are divided into two groups:

- **Transversal labels**, applicable to all categories
- **Specific labels**, unique to each category

Below is the list of categories:

1. **Text collection** (ALIM, Biblioteca Italiana, Musisque Deoque, BUP – Digital Humanities)
2. **Digital Scholarly Edition** (VaSto, Codice Pelavicino Digitale, Digital Edition of Aldo Moro's works, BUP – Ebulo)
3. **Software** (EVT, Voyant Tools)
4. **LOD** (Zeri&LODE, Dante Sources, LiLa, Biflow)
5. **Ontology** (CIDOC-CRM, HiCO, SPAR)
